

Courses are subject to change, check online catalog for updated class schedule. FW Core Courses may double count with Bacc. Core.

BACCALAUREATE CORE: with the exception of Speech and WIC, this section is only required for students earning their first degree.			
Writing I, Speech & Math 111 must be completed within the first 45 OSU credit hours & Writing II within the first 90 OSU credit hours.			
Transfer students must complete Writing II & Speech within first 45 OSU credit hours.			
Perspective Course (LA, CD, SPI, WC): no more than two courses from one Department	Met within FW Degree	Math (MTH 111 or higher)	Fitness HHS 231 & 241 -or- PAC
Literature & Arts (LA)	Met within FW Degree	WR 1, WR 2, WIC & Speech	Synthesis Courses (CGI, STS): cannot be from the same Department
Cultural Diversity (CD)	Met within FW Degree	Physical Science	Contemporary Global Issues (CGI)
Social Processes & Institutions (SPI)	Met within FW Degree	Biological Science	Science, Tech. and Society (STS)
Western Culture (WC)	Met within FW Degree	Additional Physical Or Biological Science	
		Diff., Power & Discrimination (DPD)	
			CREDITS 49

COMMUNICATIONS (all required)		CREDITS		CREDITS
WR I: WR 121 English Composition*		3	WR 222 English Composition* -or-	3
Speech: COMM 111* -or- COMM 114* -or- COMM 211*		3	WR 327 Technical Writing* -or-	3
Writing Intensive Course (WIC)^ (select one):			WR 362 Science Writing* -or-	3
FW 435, 439, FW 454, FW 497; can double count with other requirements		3	HC 199 Honors Writing*	3
			CREDITS	12-13

FISHERIES AND WILDLIFE SCIENCES CORE (all required)				
Select One:	MTH 241 Calculus for Mgmt.* -or-	4	ST 351 Intro to Statistical Methods I	4
	MTH 245 Math for Mgmt., Life & SS* -or-	4	ST 352 Intro to Statistical Methods II	4
	MTH 251 Differential Calculus*	4	FW 107 Orientation to Fisheries and Wildlife	1
Complete Series:	CH 121 General Chemistry I*	5	FW 209 Career Skills in Fisheries and Wildlife Sciences	1
	CH 122 General Chemistry II*	5	FW 251 Principles of F&W Conservation	3
	CH 123 General Chemistry III*	5	FW 255 Field Sampling of Fish and Wildlife	3
For on campus students CH 231-233 with Corvallis campus labs 261-263 may be substituted for CH 121-123.			FW 289 Communication Skills for F & W Professionals	4
			FW 307 Specialization Development	1
Complete Series:	BI 211 Principles of Biology I*	4	FW 320 Intro. Population Dynamics (Prereq: BI 370)	4
	BI 212 Principles of Biology II*	4	FW 321 App. Comm. & Ecosystem Eco. (Prereq: FW 320)	3
	BI 213 Principles of Biology III*	4	FW 410 Internship: Exploratory	1
Ecampus students may substitute the BI 204, 205, 206 series for BI 211, 212, 213.			FW 410 Internship : Intensive	3
			FW 488 Problem Solving in F & W	3
	BI 370 Ecology (prereqs: BI 211-213)	3		
			CREDITS	69

VERTEBRATE BIOLOGY CORE (select one)		SYSTEMATICS CORE (select one)	
FW 311 Ornithology	3	FW 312 Systematics of Birds	2
FW 315 Ichthyology	3	FW 316 Systematics of Fish	3
FW 317 Mammalogy	3	FW 318 Systematics of Mammals	2
FW 331 Ecology of Marine and Estuarine Birds	4	Z 474 Systematic Herpetology	2
BI/FW 302 Bio. & Conservation of Marine Mammals	4		
Z 473 Herpetology	3		
Select one additional course from Vertebrate or Systematics column (2 or 3 or 4 credits)		CREDITS	7 - 11

ADVANCED FISHERIES AND WILDLIFE SCIENCES CORE (select six, one from each category, plus one additional)					
Genetics and Evolution		Species Conservation Management		Botany (may sub FW 434 or 479 with advisor approval)	
ANS 378 Animal Genetics (4)		FW 419 The Natural Hist. of Whales & Whaling (3)		BOT 313 Plant Structure (4)	
BI 311 Genetics (4)		FW/BI 421 Aquatic Biological Invasions (4)		BOT 321 Plant Systematics (4)	
BI 345 Introduction to Evolution* (STS) (3)		FW 427 Principles of Wildlife Diseases (4)		BOT 323 Flowering Plants of the World^ (3)	
FW 370 Conservation Genetics (4)		FW 451 Avian Conservation & Management (3)		BOT 331 Plant Physiology (4)

Electives					0-20

BIOLOGY SERIES

Please note that the BI 204, 205, 206 series is only available to Ecampus students and cannot be mixed with the BI 211-213 series. It does not serve as a prerequisite to the following courses in the Fisheries and Wildlife curriculum: Z 422, Z 431, and Z 432. Also, this series may not be appropriate for careers in Veterinary, Dental, or Medical Sciences or any degrees offered through the OSU College of Science, please consult with your advisor before enrolling in the series.

PROFESSIONAL DEVELOPMENT SERIES

FW 107 ORIENTATION TO FISHERIES AND WILDLIFE SCIENCES (1 credit)

FW 107 Orientation to FW Sciences introduces students to a range of academic and career pathways in fisheries and wildlife sciences.

FW 209 CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES (1 credit)

FW209 - Career Skills in Fisheries and Wildlife Sciences offers a foundation for life-long career development by helping students understand the job market in fisheries and wildlife and learn how to evaluate and choose potential career-building opportunities. Students will learn how to identify potential internship opportunities and prepare for them by learning how to build a resume, how to write effective cover letters, and gaining the skills necessary for networking and interviewing. This course is intended for students that have completed FW107 and the general chemistry series, and have at least sophomore standing. To maximize the student's readiness, they are encouraged to have a conversation with their academic advisor about the appropriate time to take FW 209. It is recommended that FW 209 be done prior to FW 410 Internships, but exceptions may be possible.

FW 307 SPECIALIZATION DEVELOPMENT (1 credit)

FW307 Specialization Development helps students develop an additional set of classes called the "Specialization" that are focused on the student's career interests, along with advanced career planning, such as considering graduate school. Students should consult with their advisor before taking this class. Students generally take this course their junior year or after completing the chemistry and biology sequences. Students work with the course instructor and their advisor to finalize the courses within their Specialization.

SPECIALIZATION COURSE REQUIREMENTS (24 credit minimum)

The Specialization, intended to supplement the Advanced Fisheries and Wildlife Core, must contain a minimum of 24 credits. At least 20 credits will be from upper division (300 and 400 level) courses; no more than four lower division credits are allowed. A maximum of two courses may be completed prior to approval of the Specialization, additional upper division credits may be allowed through petition to advisor. With the exception of Writing Intensive Courses (WIC), double counting (when credit is given twice for a course), is not permitted between the Specialization and other University or Departmental course work. For students completing their first BS degree, 12 credit hours applied towards their minor may also be applied towards the Specialization (requires approval by Advisor in Minor Department and FW Advisor). A maximum of 12 credit hours, in any combination, of FW 401 Research and FW 410 International Internship can be used towards the specialization. Post Baccalaureate students who are completing their second degree may use a maximum of 12 credits from their first degree towards their specialization (approved by FW Advisor).

FW 410 INTERNSHIPS (4 credits minimum)

There are two types of internships: Exploratory (1-2 credits) and Intensive (3-6) credits. Students are required to complete a minimum of two internships or other approved alternative experiences (one of each type) for their degree. Students are encouraged to start gaining professional experience by volunteering or interning with a natural resource

agency as early as possible and no later than their junior year. It is recommended that both internships are completed at least two terms prior to graduation and need not be sequential.

The **Exploratory Internship** helps students explore career directions. It involves a professional experience with at least 40 hours of learning time off campus in a natural resource setting. Most students attend a professional conference, such as the Annual Conference of The Wildlife Society or American Fisheries Society, or assist a professional biologist with field work.

The **Intensive Internship** helps students experience work as a professional and gain technical skills that complement the academic/conceptual knowledge learned in classes. It involves a professional experience in an off-campus natural resource organization for a long enough time period and with enough depth and breadth to gain competence in one or more facets of a position or organization. This experience often leads to the student performing professional duties independent of supervision.

Students need to register for the FW 410 internship class for the term in which their internship occurs (even if it is summer term). Before registering, students must have their internship approved by the FW Internship Coordinator. The Internship Coordinator is responsible for guiding students, providing general oversight, and final evaluation of the internship/experience requirement. Before beginning the internship, a formal letter of understanding between the student, department, and mentor in the natural resource profession must be submitted by the student.

At the conclusion of the experience the student will complete the course by meeting the requirements listed on the FW 410 class syllabus, including submission of a resume and brief report describing the activities and what was learned. Mentors may provide a brief evaluation of the student's education.

For students that consider themselves non-traditional students, most often Ecampus students that are concerned with fitting the internships into their schedule, read this supplemental information on our [website](#).

For more information, contact the Internship Coordinator:
Danielle Jarkowsky, Danielle.Jarkowsky@oregonstate.edu, Nash 104E

CAPSTONE COURSE FW 488 PROBLEM SOLVING IN FISHERIES & WILDLIFE SCIENCE (3 credits)

Students participate in the capstone experience through FW 488 Problem Solving in Fisheries & Wildlife Science. This course is taken after a student has reached at least senior standing and is as close to the end of their degree requirements as possible. Students are required to complete FW 320 & FW 321 and are recommended to have taken one or more 400 level FW classes before they begin the capstone course. The capstone course is designed to introduce students to the synthesis of scientific information on species, habitats and ecosystems and the use of such data in shaping fisheries and wildlife conservation, management, and policy. It includes a group problem solving project and case studies.

This course focuses on three activities: 1) a review of several case histories on current, "real world" conservation and management problems presented by faculty or agency biologists who have worked on each problem; 2) discussion about the process used to logically address complex problems in fish and wildlife conservation, and; 3) independent work by students in small groups on a selected topic of their choice. The group project provides an opportunity for students to apply what they have learned in this and previous courses to address a conservation or management issue of interest. Projects include data analysis and/or synthesis, literature review, and/or evaluation of the social and economic systems involved in the controversy or management problem.
